Memory and Learning

IB Statement: 6.5 Nature of Science – Cooperation and collaboration between groups of scientists – biologists are contributing to research into memory and learning.

Please watch the remaining videos about learning and memory and answer the questions below.

Part 1 Part 2 Part 3 Part 4 Part 5

1) Why does multitasking (texting, netflixing and studying) not work?
2) What beliefs will make you stupid?
3) WHat is the most important factor in successful learning?
4) State the principles of achieving deep processing.
5) Define automaticity
6) Define overlearning.
7) Suggest a strategy of overlearning to prepare for a test (revision techniques)
8) Explain the strategies for achieving deep processing.
